

Hi!

Thank you for your entry to Öresund Downwind Challenge. Only 6 days to go, and we are super excited!

Please read this information carefully, and send me any questions you might have.

We will be using a GPS tracking mobile phone application called "Webtracking" - easy right. This app will allow the race organisation to know exactly where you are and improve the safety for the race. It will also help the race organisation with time accuracy. You will receive a separate e-mail this week with details on login and usage. But please download the app already today from Appstore if you have Iphone, or if you have Android download the APK attached in this e-mail. More information on installation will follow tomorrow.

The App uses mobile data - but extremely little. I was out paddling for 2 hours and it had sent 55kb during this time. There is free roaming within the EU which means the usage will cost very little if any.

We will be extremely careful with checking the mandatory safety equipment so please make sure you have it. Mandatory equipment: PFD, Leash, Waterproof packed cellphone, Flare, whistle, Fluorescent shirt.

There has been an issue with the registration and entries or interest in SS2 for Sunday 24th of September has not been compiled. If you have entered in SS2, or don't have a partner, but want to paddle SS2 please send me an e-mail. Thanks!

Last but not least we have increased the cash and gift card prize pool to 11 000 SEK, and we will have additional great gifts from Thule.

Don't forget to follow our Facebook
